Task Description	Assigned to
Solve receipt merge conflict to have a fully functional running receipt that is tabbed by category	Connor Clarke
Connect Cashier view to database	Connor Clarke
Link all front-end pages of customer kiosk	Siddhi Mittal and Meenalika Singh
Connect the manager view to the menu items backend so that we can make new items and remove them if needed.	Luke Lopez
Create the Managers report system again in the manager view. We will have very similar reports as project 2.	Luke Lopez

Minutes from Previous Meeting

In this meeting, we reviewed our progress on Sprint 2, went over updates to the project backlog, and analyzed our burndown chart status. Among the key accomplishments were implementing cashier checkout options and making progress on the Manage Inventory feature. Although we successfully completed several tasks, a few items remain in progress, such as resolving the receipt merge conflict and connecting the Cashier View to the database.

Looking ahead, we plan to finalize the Cashier View, add images to the Customer View, and merge branches for full functionality. Our main assignments include linking the Manager View to menu

items, generating reports similar to those in Project 2, and completing all front-end pages for the Customer Kiosk.
